

PSM 2 EVALUATION 3: SUPERVISOR

CLO1 - 25%
CLO2 - 5%
CLO3 - 5%
CLO5 - 5%

NUM	CONTENT	5	4	3	2	1	0	Weightage	Mark Given	TOTAL IN %
THESIS										
CLO1	INTRODUCTION & PROBLEM STATEMENT - introduction should be related to domain background, importance of the subject and current issues according to proposed topic - explanation of problem should be related to the domain / knowledge or solution gap	All elements are excellently written with proper organisation and flow	<in between>	Most elements are satisfactorily written with moderate quality of organisation and flow	<in between>	Most elements are poorly written and poorly organised	No explanation	0.2	5	1.00
CLO1	OBJECTIVE & SCOPE - Objective MUST be 3 Objectives (reflecting SMART concept) - Scope must be related to the project	All objectives are clearly stated reflecting SMART concept and aligned with problem statement	<in between>	Objectives are stated and aligned with problem statement but not all reflecting SMART concept	<in between>	Objectives are poorly stated	No objectives	0.2	5	1.00
CLO1	LITERATURE REVIEW- UP-TO-DATE BASED ON LATEST DEVELOPMENT IN THE FIELD - The three related works (reviewed in PSM1) are still relevant - Analysis and comparison on previous system/method and should highlight on features/strength/ weakness/ advantage/ disadvantage based on latest development.	Clearly written and fulfil all criteria	<in between>	Satisfactorily written and fulfil some criteria	<in between>	Poorly written and does not fulfil most criteria	No explanation	0.4	5	2.00
CLO1	PROJECT/RESEARCH LIFECYCLE - should describe on applied / used project management framework in the project. Project Based: SDLC (Agile,RAD etc) Research Based: Research Framework	The described lifecycle is practical and applicable to the project	<in between>	The described lifecycle is somewhat practical and applicable	<in between>	The described lifecycle is neither practical nor applicable to the project	No description	0.2	5	1.00
CLO1	IMPLEMENTATION OF THE REQUIREMENT - requirement implementation is clearly stated. Project Based: Functional and Non-Functional Requirement, Constraints and limitations - all requirements has been implement Research Based: Input, Output, Process description, Constraints and limitations, Case Study - all elements mentioned has been implemented.	Fully achieved following original/enhanced project requirement	Mostly achieved following original/enhanced project requirement	Partially achieved with downgraded project requirement	<in between>	Mostly not achieved	No implementation	0.6	5	3.00

CLO1	IMPLEMENTATION OF THE DESIGN SOLUTION - solution design implementation is clearly stated. Project Based: Context Diagram, Use Case Diagram & description, Activity Diagram - the implementation is tally with the Context Diagram, Use Case Diagram & description, Activity Diagram is clearly stated. Research Based: Pseudocode/Algorithm/Flowchart/Model - the implementation is tally with the Pseudocode/Algorithm/Flowchart/Model	Fully achieved following original/enhanced project design	Mostly achieved following original/enhanced project design	Partially achieved with downgraded project design	<in between>	Mostly not achieved	No implementation	0.8	5	4.00
CLO1	IMPLEMENTATION OF THE DATA/INPUT/OUTPUT DESIGN [CRITERIA BASED ON RG] - data design implementation is clearly stated. Project Based: ERD, Database Design (PK, FK), Activity diagram - the implementation is tally with ERD, Database Design (PK, FK), Activity diagram. Research Based: Dataset description - the implementation of the dataset is done correctly.	Fully achieved with outstanding use of suitable data/input to produce output	<in between>	Partially achieved with suitable data/input to produce output	<in between>	Mostly not achieved	No implementation	0.6	5	3.00
CLO1	6. TESTING APPROACH/STRATEGY AND DESIGN [CRITERIA BASED ON RG] - should describe the testing strategy/approach and has completed the design of the testing (UAT, FAT, etc) appropriately	Testing approach is relevant, comprehensive and well described	<in between>	Testing approach is relevant but not comprehensive, satisfactorily described	<in between>	Insufficiently explained.	Testing approach is irrelevant and poorly described	0.8	5	4.00
CLO1	RESULT DISCUSSION - critically explain the result. - able to discuss and analyze the relevant result from the proposed work (Example: table, graph, UAT elements etc.). - Ability to identify the strength, weakness and challenges during the development of the solution.	Thorough and comprehensive critical analysis and discussion of the result	<in between>	Adequate analysis and discussion of the result	<in between>	Result is poorly discussed	No result and discussion	1	5	5.00
CLO1	REFERENCE -Minimum 10 references related to the project must be stated. -Facts are properly cited with correct reference in the proposal content - Must follow the proposal format	All references provided are related to the content and correctly formatted	<in between>	Some references are not related to the content but mostly in correct format	<in between>	All references are not related to the content	No references	0.2	5	1.00
SYSTEM / SOLUTION										
CLO2	PROJECT DEVELOPMENT - System / Solution fulfills the objective. (SMART concept)	Fully achieved following original/enhanced proposal	Mostly achieved following original/enhanced proposal	Partially achieved with downgraded proposal	<in between>	Mostly not achieved	No solution.	0.4	5	2.00
CLO2	PROJECT DEVELOPMENT - System / Solution fully developed using appropriate tools.	Fully achieved	<in between>	Partially achieved.	<in between>	Insufficiently achieved.	No solution.	0.6	5	3.00
CLO3	PROJECT VALIDATION - System validated using appropriate method or tools	Fully achieved	<in between>	Partially achieved.	<in between>	Insufficiently achieved.	No validation.	0.4	5	2.00

[illegible]
